

Children Toothbrush

WHERE FROM & COST: www.amazon.co.uk, £12.99

HOW TO USE: Some children may find the sensation of the bristles very uncomfortable so experiment with different bristle types e.g. silicone. Experiment with different toothpastes, sometimes flavours can be perceived as painful e.g. mint = burning. If your child is a music lover, consider a singing toothbrush.

Vibrating toothbrushes can calm kids who need more sensory feedback or help train hypersensitive kids to tolerate more sensations. A vibrating toothbrush can provide sensory stimulation through vibration as kids work on biting, chewing, jaw strength, rhythmic chewing, and other oral motor skills.

SAFE USAGE:

- Use under supervision
- CHOKING Hazard use with caution
