## BONNYCO Light Drawing Board

**ABOUT THE EQUIPMENT:** The magic whiteboard pens with lights are ideal for use in the dark or in dimly lit rooms. The darker the room, the higher the light intensity in the drawings. Your drawings will be much more durable with the light off!

To play with the magic boards, you must press the ultraviolet light button on the spy pen and draw on the board. We have also included a UV torch with a simple on/off button to make it easier to draw pictures for those who need help with fine motor skills. The closer you draw to the board, the sharper the drawing will be and the longer it will stay on the board.

After a few minutes, the pictures on the light board will fade little by little. They will last up to a maximum of 15 minutes so the children can draw on the magic board again.

**WHERE FROM & COST:** Amazon cost around £15

**IDEAS OF USE:** Begin simple cause and effect recognition during mark making as well as developing fine motor skills and shared attention to an activity.

### SAFETY MEASURES (BULLET POINTS)

- UV pen included with set has a small cap that can be removed- possible choking hazard.
- Batteries in larger UV torch can pose safety risk if left unattended.
