Tactile Weighted Snake

ABOUT THE EQUIPMENT : Weight and deep pressure have been found to have a calming effect on "sensory seekers" helping them to relax and feel more grounded. This in turn helps them to function more effectively in everyday life by allowing them to sleep better, concentrate more effectively and avoid meltdowns. Can be worn around the neck, over the lap or across the body. Use as a comforter at night for an unobtrusive way to add weight and sensory feedback. The weight can help them to feel more grounded by improving body awareness, helping sleep, focus, relaxation etc.

WHERE FROM & COST: www.sensorydirect.com, £35.95

SAFE USAGE:

- Use under supervision
- Always seek professional advice before purchasing and using weighted products
- Do not wear for extreme lengths of time as this can lead to child becoming under alert
